

# Resources for COVID and Antibody Testing in Oregon by County

Where to access testing without a referral for free or at lower cost and what to expect from testing.

This resource was compiled for formerly incarcerated Oregonians and others in their households by the Oregon Justice Resource Center. Learn more about us at [www.ojrc.info](http://www.ojrc.info).

If you have questions about your issues related to COVID-19 exposure while you were incarcerated, please feel free to contact us at 503-944-2270 or [info@ojrc.info](mailto:info@ojrc.info).

# Oregon Health Authority Guidelines

The OHA has revised guidelines for COVID-19 testing to prioritize BIPOC communities that have been disproportionately impacted by the virus as well as all frontline workers. This has led many facilities to improve testing accessibility for these communities by lowering or waiving costs.

Learn more: <https://www.oregon.gov/oha/ERD/Pages/OHA-revises-COVID-19-testing-guidelines.aspx>

## What to Expect When You Get Tested

The test involves a nasal swab that goes in quite far, so you will feel some discomfort.

Learn more: <https://multco.us/novel-coronavirus-covid-19/covid-19-testing>

## If You Test Positive

Assume that you are actively contagious to other people. Stay home and stay away from others until you have had no fever for three days, your symptoms improve, and at least ten days have passed since your first symptoms.

Learn more: <https://multco.us/novel-coronavirus-covid-19/covid-19-testing>

## Widespread Antibody Testing

The American Red Cross is now offering free antibody testing to all *eligible* blood, platelet, and plasma donors at all donation sites. People who have been incarcerated for 72 or more consecutive hours in the twelve months preceding their donation are **not** allowed to donate. The antibody test will be in addition to those normally made on the blood that is collected for donation. As of the time of writing, antibody testing is available indefinitely. Antibody test results are available in 7–10 days via the Red Cross Blood Donor App or the donor portal at [redcrossblood.org](http://redcrossblood.org).

American Red Cross blood drives change location daily. To schedule an appointment, visit [redcrossblood.org](http://redcrossblood.org) and locate your nearest site by typing in your zip code in the red “Find a Blood Drive” box in the upper right hand corner of the webpage. Alternatively, you can call 1-800-733-2767 and choose option 1 to schedule a blood donation.

Learn more: <https://www.redcrossblood.org/donate-blood/dlp/covid-19-antibody-testing.html>

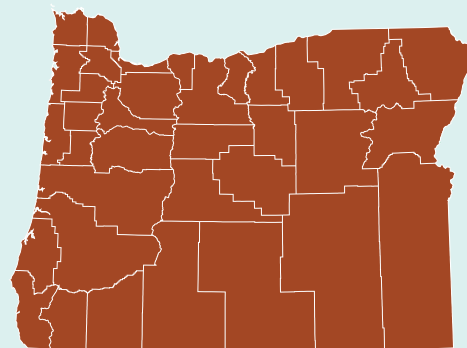

“Drive-thru” testing sites require that you are inside a vehicle. Walk-up is not an option at drive-thru locations.

County health departments throughout the state have sporadically held pop-up, low-cost or free testing on certain days with designated times. It is a good idea to check your local Health Department website weekly in order to keep tabs on these sorts of events.

The COVID-19 and antibody tests listed below do not require a testing referral from one’s primary care physician and are free or around \$100 or less. There are more testing options in all counties, but they do require a referral, payment, and/or testing criteria, such as having symptoms of COVID. To the best of our knowledge, any counties for which information is NOT listed below are not currently providing testing without a referral for free or at around \$100 or less.

Find all of these locations marked on our Google Map at <https://bit.ly/3iQQWlt>.

## Testing Site Information by County

### Portland Metro Area

(Multnomah, Washington, Clackamas, Yamhill)

#### Multnomah

The Multnomah County Health Department will contact you with your results. Learn more at <https://multco.us/novel-coronavirus-covid-19/covid-19-testing>.

#### COVID-19 testing
